SOVEREIGNTY SCORE

Measure your exposure before automating

LEVEL	Foundation
DURATION	45 min - 1h30
USE	Diagnostic
TRACK	Step 1 / 6

OBJECTIVE

Before agentifying anything, measure your degree of **dependence** , and therefore your exposure: across four dimensions. The greater the dependence, the weaker the sovereignty: **govern before you automate**.

1 HOW TO READ THIS SCORE

Rate each dimension from **0 to 25** based on your level of dependence (0 = fully autonomous, 25 = fully dependent). The sum yields a **dependence index out of 100**: this is the inverse of your sovereignty.

Scoring guide: for each dimension, count the number of questions you answer « yes » to:

0 – 8 none · you retain control | 9 – 16 one · partial dependence | 17 – 25 both · strong dependence

2 THE FOUR DIMENSIONS OF DEPENDENCE

TECHNOLOGICAL / 25

Actual control over your models, infrastructure, and data.

- Would a change of provider (pricing, terms of service, shutdown) paralyze you?
- Does your sensitive data flow outside your control?

YOUR SCORE _____ / 25

ACQUISITION / 25

Share of your customers reached through channels you do not own (e.g. marketplaces).

- Does a third-party platform capture the bulk of your customers?
- Would delisting cut you off from the market?

YOUR SCORE _____ / 25

DECISIONAL / 25

Decisions already delegated to systems without human governance.

- Are binding decisions being made without review?
- Could you justify a decision made by your AI?

YOUR SCORE _____ / 25

FINANCIAL / 25

Concentration of your revenue or funding among a small number of players.

- Does a single customer or channel account for a critical share of revenue?
- Would its loss threaten business continuity?

YOUR SCORE _____ / 25

SOVEREIGNTY SCORE

Measure your exposure before automating

LEVEL	Foundation
DURATION	45 min - 1h30
USE	Diagnostic
TRACK	Step 1 / 6

3 YOUR DEPENDENCE INDEX

Add up your four scores. **The higher the index, the greater your exposure** , and the more governance must precede automation.

/ 100

0 – 33

SOVEREIGNTY UNDER CONTROL

Agentification is possible with light-touch governance. Proceed to ACF-02.

34 – 66

MODERATE EXPOSURE

Govern and reduce dependencies before expanding agent autonomy.

67 – 100

CRITICAL DEPENDENCE

Reduce your exposure **before** any further automation. Top priority.

4 YOUR THREE ACTION PRIORITIES

Identify the dimension where you are most dependent: that is where your sovereignty is at stake. Note three concrete actions to reduce it.

#	ACTION TO REDUCE THE DEPENDENCE	TARGET DIMENSION	DEADLINE
1			
2			
3			

Next step: once your exposure is measured, map your key decisions with **ACF-02 · Decision Map**, then assess their criticality with **ACF-03**.
