MODEL VERSION LOG

What reopens the mandate

LEVEL	Operational
DURATION	1h - 2h30
USE	Running an agent
TRACK	Toolkit

OBJECTIVE

Tie every signed mandate to the model version the agent was tested on, and reopen the mandate when that version changes. The supplier replaces on its own schedule; the signed text does not move by itself.

1 THE VERSION UNDER MANDATE (← ACF-13)

TESTED VERSION

Exact name and number

ACCEPTANCE DATE (← ACF-P2)

OWNER WHO SIGNED

2 THE CHANGE LOG

DATE	PREVIOUS	NEW	NOTIFIED BY	MANDATE REOPENED ON

3 WHAT TRIGGERS A REVIEW

VERSION CHANGE

Major or minor: both count

ANNOUNCED CHANGE OF BEHAVIOUR

Supplier release note

OBSERVED DRIFT (← ACF-P4)

Supervision, sampled review

A mandate is signed against a version. When the version changes, what was signed no longer describes what decides.
