STOP MECHANISM TEST

The kill switch proven every quarter

LEVEL	Operational
DURATION	1h30 - 3h
USE	Running an agent
TRACK	Toolkit

OBJECTIVE Guarantee that the stop works before it is needed. A mechanism never triggered is a mechanism nobody knows works.

1 THE TRIGGER CONDITIONS (← ACF-07)

YOUR ORGANISATION CONDITION

The numeric threshold that triggers the stop

2 THE FIVE-STEP PROCEDURE · EACH STEP WITH A DESIGNATED OWNER

1 · DETECT

Supervision or an automatic alert

2 · CONFIRM

A human confirms within minutes

3 · ACTIVATE

The DDAO triggers the stop

4 · ISOLATE

The technical team cuts the agent's access

5 · CHECK

Verify the handover to human processing
